

## **【Division of Research & Inspection for Infectious Diseases】**

Division of Research & Inspection for Infectious Diseases plans as below.

### 1. Test and Research activities

Infectious disease in livestock

- 1) Enzootic bovine leukosis
- 2) African swine fever and classical swine fever in wild boar
- 3) Highly pathogenic avian influenza in wild bird
- 4) Parasitic disease
- 5) Bacterial mastitis

Zoonosis

- 1) Severe fever with thrombocytopenia syndrome (SFTS)
- 2) Rabies
- 3) COVID-19
- 4) Prion diseases
- 5) Food-borne parasitic diseases
- 6) Campylobacteriosis

### 2. Holding seminars and lecture classes about infectious disease in livestock and zoonosis

### 3. Preservation and supply of bioresources including pathogenic organisms

### 4. Conduct of Contracted Research

Utilizing a BSL-3 facility, inactivation studies involving high-consequence pathogens, such as highly pathogenic avian influenza virus and classical swine fever virus, will be commissioned by and conducted for companies and other organizations.
