

Declaration on the Promotion of Student Mobility

University of Miyazaki

The University of Miyazaki (UoM), guided by the slogan “*Look at the World, Start with the Community*”, is committed to advancing education and research that contribute to both the local community and the global society. Building upon this mission, the UoM articulated in 2025 its Future Vision for 2040, titled “*Creating the Future, Illuminating the World.*” Grounded in regional contribution, we are dedicated to tackling global challenges—such as food security, energy sustainability, and infectious diseases—that resonate with local and national issues, while nurturing individuals who can contribute to the global community. As a university that is open to the world and chosen by the world, we recognize the vital importance of diversity and are committed to cultivating internationally competent young individuals.

In this spirit, the UoM hereby declares its firm commitment to promoting student mobility and international exchange, thereby contributing to the sustainable development of Miyazaki, Japan, and the world.

1. Vision

Through establishing a virtuous cycle between outbound study opportunities for Japanese students and inbound enrollment of international students, we aim to realize a *Global Campus*—an advanced learning environment where students challenge and inspire one another with a global perspective. Our goal is to foster globally minded young individuals capable of contributing to the resolution of challenges faced by Miyazaki, Japan, and the wider world.

2. Initiatives

(1) Cultivating Global Awareness among Japanese Students

To broaden the perspectives of Japanese students, deepen their understanding of diverse backgrounds and values, and foster the ability to collaborate creatively with people from various cultures, the UoM will enhance study abroad and international exchange opportunities and support students’ active participation.

(2) Promoting the Acceptance of International Students

By strengthening strategic partnerships with overseas partner universities and expanding programs tailored for international students, the UoM will promote the active acceptance of talented students from around the world.

(3) Globalizing the Campus

- The UoM will actively support international research and exchange activities among faculty, staff, and students in collaboration with partner institutions, thereby reinforcing substantive partnerships.
- By expanding opportunities for interaction between Japanese and international students on campus and creating an environment that deepens intercultural understanding, the UoM will also contribute to the internationalization of the local community.

Hiroshi Sameshima, M.D., Ph.D.
