

Opening up the Future of the Region
Step by Step Program to Foster Women Researchers

International Symposium on the Diversity Gender Sciences Research @ University of Miyazaki

This symposium, organised by female researchers at the University of Miyazaki, integrates perspectives from several different research fields, and features cutting-edge researchers from Japan and from overseas. In our second year hosting this international symposium we focus on the question of how Gender Sciences can help us explore the boundaries and build bridges between the natural and social sciences. We hope these papers will help inspire you to contribute to the development of a more gender equal society.

Please join us!
