

Joint Research Projects, 2018

	Principal Investigator	Research Theme	CADIC Counterpart
1	Ichiro YASUTOMI, Yubetsu Service Center for Group Management of Cattle, Co. Ltd.	Pathophysiological analysis of cattle hairy attack as a refractory infectious hoof disease	Takako TANIGUCHI
2	Yasuhiro TAKASHIMA, Gifu University	Development of serological tests for Toxoplasma infection in poultry	Ayako YOSHIDA
3	Madoka SEKI, Iwate University	Seroprevalence study of fasciolosis in humans and animals in Japan by ELISA using a highly-reliable recombinant antigen	Haruhiko MARUYAMA
4	Satoshi INOUE, National Institute of Infectious Diseases	Development of government-academia collaborative MOS(Monitoring and Surveillance)System for rabies and canine/feline derived parasitic zoonoses in human and livestock-With cooperation among Miyazaki prefecture,Miyazaki city and University of Miyazaki-	Naoaki MISAWA
5	Yasuhito EBARA, Kobe University	Development of visual detection system for porcine epidemic diarrhea virus	Tamaki OKABAYASHI
6	Seiji HOB0, Kagoshima University	Analysis of the immunity functions in the bronchoalveolar range of the Japanese black cattle	Ryoko UEMURA
7	Syuji ANDO, National Institute of Infectious Diseases	Infection cycle and risk assessment on tick-borne zoonoses	Yumi KIRINO
8	Takumi HAYASHI, Bungo-Ono Livestock Hygiene Service Center, Oita Prefecture	Studies of immunological mechanism during bovine leukemia virus infection	Junzo NORIMINE
