

Bangladesh–Miyazaki ICT Engineers Educational Training (B- MEET)

In introducing Bangladesh's advanced ICT human resources to Miyazaki through B-JET, it is expected that ICT human resources from Bangladesh who have established themselves in Miyazaki will play an active role, and that Miyazaki's industries, including employing companies, will develop. On the other hand, in Bangladesh, ICT companies affiliated with BASIS*² have expressed expectations to do business with Japanese companies, and there is a need for Japanese language and business etiquette training for these companies and local ICT engineers that anticipate doing business with Japan.

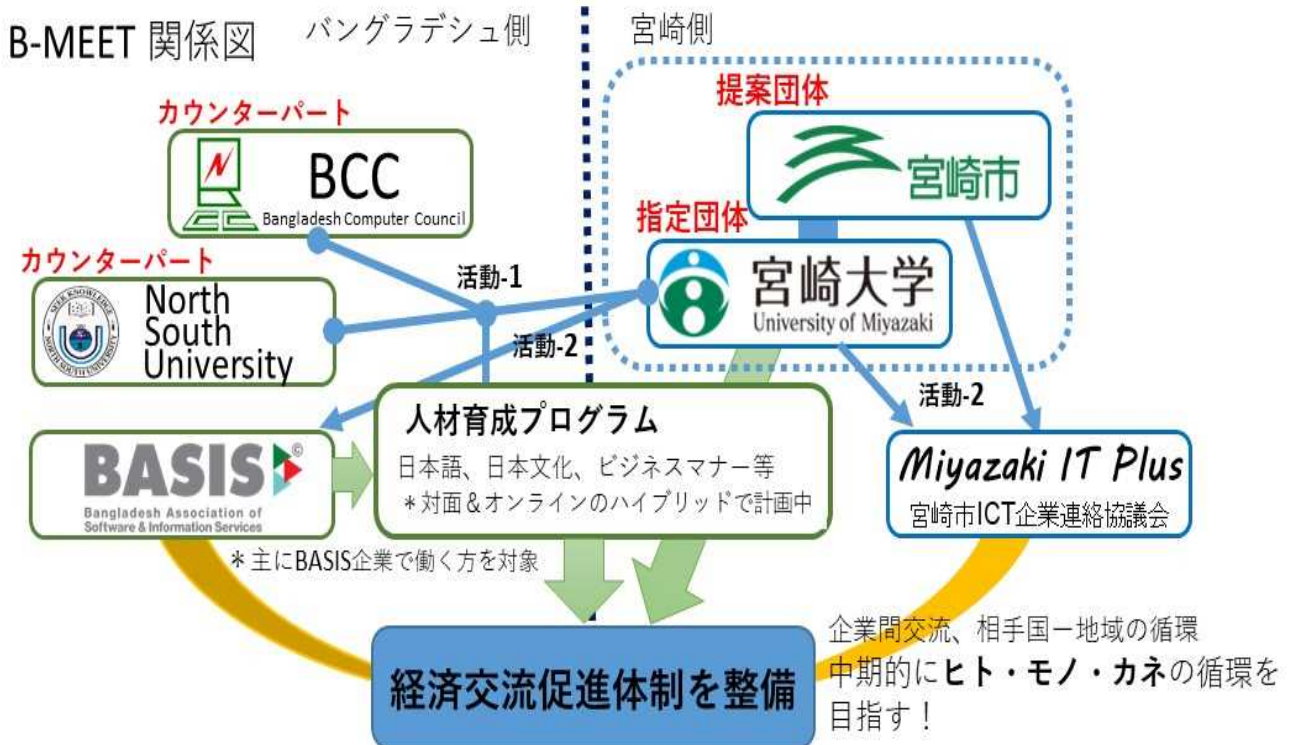

Accordingly, the "Bangladesh–Miyazaki ICT Engineers Educational Training (B-MEET)" was conceived, utilizing the Special Quota for Regional Revitalization of JICA's Partnership Program. This is a program in which Miyazaki City is the proposing organization and the University of Miyazaki (UoM) is the implementing organization, with the cooperation of Miyazaki IT + (Miyazaki City ICT Enterprise Liaison Council), and with BCC*³ and NSU as counterparts on the Bangladeshi side. The objective of this program is to promote economic exchange between Bangladesh and Miyazaki by providing training programs in the Japanese language, business etiquette, etc. for ICT engineers from BASIS and IT human resources other than CSE (Institute of Science and Technology) graduates, while supporting ties between BASIS and Miyazaki companies.

By training local ICT human resources who are interested in doing business with Japan and promoting economic exchange, this initiative is geared toward an ongoing mutually beneficial relationship that contributes to the development of both countries. In the future, it aims to establish a medium to long-term circulation of people, goods, and money between Bangladesh and Miyazaki.
